

Is there any historical data that would need to be imported into the new system?

We would like for our current data through APP139 to be exported, though not a deal breaker if unable to.

Does the airport currently maintain ESRI GIS maps or any existing GIS environment that would need to be integrated?

The airport does not currently maintain ESRI GIS or any existing GIS environment.

Are there any third-party integrations currently required or anticipated?

There are not any third-party integrations currently required or anticipated.

Is there a requirement for SSO (Single Sign-On) integration?

There is not a requirement for SSO integration.

Would you like SMS (Safety Management System) capabilities to be included within the scope?

The airport currently has a waiver for SMS that expires next summer. While not required at the moment, it is something that we would look to add on in the future.

Is there an expectation for the ability to create or develop custom analytical reports?

We would expect the ability to create or develop custom reports.

How many anticipated users (licenses) will the system require?

We anticipate about 50 users.

Are there any specific integrations needed?

There are currently no specific integrations needed.
